

On Monday, September 9th, the Yonkers Fire Department will begin the annual fire hydrant inspection program.

The program is expected to run for 6 to 8 weeks.

The inspections are required to ensure proper fire protection.

You may experience cloudy or discolored water and fluctuations in water pressure. If cloudy or discolored water occurs, please run the cold water until the water runs clear.

The discoloration represents no health hazard. Nevertheless, it is recommended that you check the water before using it for things such as cooking, drinking, and washing clothes.

If any problems persist, or you have questions regarding water quality, please contact the Water Treatment Plant at (914) 377-6765 or the 24 hour Mayor's Help Line at (914) 377-4357.

Thank you.
